

K-Love radio station on both 95.9 and 91.9 provide a very unique Christian message and Christian based public service to our rural part of WV. To allow LPFM stations to have priority over long standing existing FM translator based stations is improper and will result in the loss of a vitally needed service to our community listeners. In our mountainous terrain, the Low Power FM stations having such priority would not have adequate coverage for their listening audience anyway not to mention their most likely non-christian program themes that are area is already saturated with from other FM stations. K-Love has earned a tremendously good reputation in our area and we will do all we can to keep their stations both on the air and their existing good programming format in tact.
